SIDELOADERS WITH SUPERIOR LIFTING CAPACITY
Modern, effective and safe technology

Why choose a HAMMAR?

With almost 40 years in the industry, made to order and experience of customers’ needs across the world, we dare to promise quality, safety and service. But why choose a sideloader instead of old-fashioned crane technology or fork-lift trucks? The answer is simple: time, safety and costs. When a vehicle comes to the terminal with its container, unloading should start - vehicles standing around cost money. So why wait for a crane, truck or perhaps have to uncouple a trailer? With a HAMMAR the driver him or herself unloads the freight in a few minutes and is then able to drive away. This means that s/he does not need other people to unload a container from his or her vehicle.

We provide proven and reliable technology which rationalises container handling and makes it more effective, no matter where you wish to transfer or transport them. That is why we have over 70% of the world market. That is why you choose a HAMMAR.

Hammar Maskin – a reliable company

Hammar Maskin is a reliable company which has always grown by its own means. This provides the company and its customers and suppliers with a sound financial base. They can feel safe in the knowledge that Hammar Maskin will continue to be a reliable partner. Thanks to its good solvency, Hammar Maskin has succeeded in obtaining the highest credit rating - AAA – from Dun & Bradstreet (Soliditet), for no less than 13 years, of which eight were consecutive.

HAMMAR is written on your sideloader, you are safe. Year after year.

HAMMAR sideloaders are found all over the world and operate in all environments.

HAMMAR Twinlock - an example of our patented technology.

AAA
Choose a model to suit your requirements

Why choose the 150 Series?
The HAMMAR 150 Series is a combination of the latest technology and a wealth of experience. It has been developed with the focus on lifting capacity and flexibility. The 150 Series has the highest lifting capacity in our range, starting at 36 tonnes in the basic design and available with a full 42 tonnes of capacity. The most powerful sideloader in the world! It has capacity to stack two fully loaded High Cube (9’6”) containers on top of each other and this permits you to lift containers to and from even low chassis and railway wagons with ease. If you prize strength and flexibility, a HAMMAR in the 150 Series is the obvious choice.

Standard
HAMMAR 151 HS 20’-40’ with a fixed chassis and a lifting capacity of 36 tonnes. You get the most powerful sideloader in our range. It also stacks HC containers (9’6”) simply and safely. Naturally, without needing to shorten the chains.

Telescopic / Combined
With a HAMMAR 151/152 C, F or T, with a telescopic or combination chassis, you always make full use of the short and flexible chassis. You are short in 20’ position, which means that you fit into a tight space. As an option, you can select 45’ capacity.

Megalifter
This HAMMAR 151 HC takes 20’-60’ and lifts 42 tons!
Unrivalled flexibility, safety and capacity

The HAMMAR 150 Series has been developed with the focus on lifting capacity and flexibility for all types of container handling.

- **Extra range**
The 150 Series has extra crane outreach to allow you to stack 9'6" containers even in a tight space. Rapid and reliable, without the need to shorten the chains.

- **Flexible solutions**
With the flexible stabilizers you get closer and can lift between trailers safely and with high precision.

- **Adequate capacity**
Capacity and safety to lift and transport two 20' containers.

- **Always on your way**
With Model 151 or 152 you only load from or over to another vehicle or trailer – and you are on your way again.

- **Load from the ground**
With a sideloader you put the container on the ground, drive in with the forklift truck and unload. Could it be any simpler or safer?

- **Always on your way**
With Model 151 or 152 you only load from or over to another vehicle or trailer – and you are on your way again.

- **Stacks high cubes safely and smoothly**
Complete safety when you are stacking – always four points of support with extra stabilizers. In addition, never any need to shorten the chains in order to be able to stack. Perfect in confined spaces.

- **Simple lifting from railway**
Simple to lift containers to and from railway wagons. The flexible stabilizer with a small footprint can be placed both on the ground and on the railway wagon.
We keep our promises

Safety, quality and service are values which have underpinned Hammar’s development since the outset in 1974. But without substance they are just empty words. Therefore we have summarised the main features in 15 points. Please feel free to compare us with other alternatives.

Not just empty words
We promise maximum safety, top quality and best service. These are values which have underpinned Hammar’s development since the outset in 1974. But without substance they are just empty words. Therefore we have summarised the main features in 15 points. Please feel free to compare us with other alternatives.

Safety:
• Double hydraulic safety provides safe lifting
• Lifting stops if the stabilizers are not extended
• Roll and tilt-safe with long stabilizer outreach
• Safe lifting; always four points of support when stacking
• Tried and tested, user-friendly technology

Quality:
• Swedish quality; made to order
• Swedish high-strength steel
• Low tare weight = higher payload
• High second-hand value, we trade in second-hand HAMMARS
• Wear resistant technology and simple to service

Service:
• Service network across the world
• Skilled technical service
• You can contact us at any time for a quick answer
• Clear information via short decision paths
• Rapid and reliable supplier of spare parts

Quality
All cylinders have OC valves and radial bearings for perfect operation and safety.

Service
Spare parts and skilled personnel who can advise you are never far away.

Safety
Always safe lifting with long outreach on stabilizers.

Quality
The fully automatic laser cutting machine, a major investment, provides precision-cut steel parts and reduces costs.
Solutions for all environments

Naturally all our models can be specially adapted to take account of your needs and requirements.

Adapted to your requirements
We do not have a standard solution for everything. We custom build in accordance with your specific requirements – it is best like that. If you need to drive on really bad roads, we equip your sideloader with a Centerpoint bogie. If you need a low vehicle to get under bridges, we supply your HAMMAR with a Gooseneck chassis. We comply with your country’s legislation. And among our accessories you will find solutions and help for any problems which may arise. That is a promise.

ADR
For haulage of hazardous goods, we provide ADR equipment which complies with all classes.

Radio control
Choose between single or two-handed radio. Both control all the functions and cutting and off-loading times significantly. Simple pictograms show the functions. The radio can be connected/ disconnected in one simple operation. Our cable control is always included in the delivery.

HOPE
HAMMAR Optical Positioning Equipment shows the driver when s/he is in the correct position to lift the container.

Central lubrication
Can be factory-fitted on your HAMMAR. Low lubrication and maintenance costs. Reduced wear and tear - increased service life.

Separate engine
Should you need a separate power pack on your HAMMAR, we have reliable 80hp (60 kW) environmentally-friendly engines available.

Power take off (PTO)
We equip your vehicle with power take off as standard: the optimum solution for the highest reliability, service and economy. The hydraulic system with PTO has a very low tare weight and minimum diesel consumption.

Twinlock
With technology and design from our safety hooks, we have made the simplest, safest and lightest lock to connect two 20‘ containers.

Safety Hooks
HAMMAR’s patented forged steel safety hooks are very small and make the driver’s work easier. It is impossible for them to fall out of the corner castings during lifting.

Gooseneck chassis
No matter where you are – with our Gooseneck chassis you meet all height regulations in the world.
